PREFACE

Housing is one of the basic necessities of life, which provides shelter and amenities for maintenance of privacy, family health and desirable living conditions. Therefore, data on housing structures and their facilities is indispensable for the planned development of a progressive nation. Moreover, sustained migration from rural to urban areas in search of better jobs and living conditions requires huge efforts for providing better housing and related facilities. Scientific planning for this effort requires up-to-date data on housing at micro level.

Housing census provide the housing stock and the living conditions therein at a particular point of time. The data on housing in detail has been published at district and provincial level in the District / Provincial Census Reports. However, with the inception of new local government system in the country under the devolution of power plan of the government, the demand of housing data at sub- district level is envisaged from the planners in order to prepare development plan in the housing sector at micro level. In order to facilitate the planners for construction of housing in a scientific manner, basic housing statistics compiled at tehsil level is being published in this report.

The preparation of this report was an arduous job and I would like to place on record my appreciation for the officers and staff of Data Processing Branch for their efforts in making this publication possible.

I hope this report will serve as a useful and handy reference to housing data in concise form, down to the tehsil level for all the data users.

Islamabad, the 13th April, 2002

KAMRAN ZAFAR
Chief Census Commissioner
