POPULATION AND HOUSING CENSUS 2-18 MARCH, 1998

ADVANCE TABULATION ON SEX, AGE GROUP, MARITAL STATUS, LITERACY AND EDUCATIONAL ATTAINMENT

The fifth Population and Housing Census of Sindh was conducted from 2nd to 18th March, 1998. The time frame in few areas of Karachi and Ghotki was extended upto 20th March, 1998, on the request of local authorities for being large block size. Soon after its completion, demands for its data started pouring in. Consequently, five bulletins one each at national and provincial level providing data on population by sex upto tehsil level and for individual urban localities were published (provisional) as the same were compiled from the summary sheets prepared by enumerators after completing their assigned areas i.e. blocks.

An early need for some more data on relatively important characteristics namely, sex and age group, marital status, literacy and educational attainment was also realised for policy/planning purposes. It was, therefore, decided to release advance tabulation in the form of bulletins one each at National and Provincial level on the basis of a scientifically selected sample respect of these variables which is also provisional. The overall sample size for Sindh was 1.5 percent of the rural households and 2.1 percent of the urban households.

Data on sex, age and marital status serves as a basis for estimation and forecasting of population growth and to calculate various demographic indices as a guide for public health and social welfare programme. Literacy and educational data provides a basic inventory of manpower skills and needs for additional education and training. These data when related to data on other economic characteristics provide insight into the factors and processes of social, economic and demographic changes which are very important for the formulation of policy/planning and administration of programmes for economic and social development.

SEX AND AGE COMPOSITION

The quality of age reporting in the province is not good enough which could be attributed to illiteracy, general ignorance about age and hesitation on the part of respondents to provide accurate ages particularly of females, young children and elderly people. As usual, there is concentration of population at certain age

digits like 0, 5, etc. The following table gives percentage distribution of population of Sindh by sex and five year age group and sex ratios in respect of the last two censuses:-

| Age group | 1981 | | 1998 | | 1981 | 1998 |
|----------------|------|--------|------|--------|-----------|-------|
| | Male | Female | Male | Female | Sex Ratio | |
| 0-4 | 14.4 | 17.9 | 14.5 | 15.4 | 89.3 | 104.7 |
| 5-9 | 16.1 | 17.0 | 15.4 | 15.8 | 104.5 | 109.2 |
| 10-14 | 12.9 | 12.1 | 12.6 | 12.0 | 118.7 | 117.1 |
| 15-19 | 9.5 | 8.5 | 10.1 | 10.7 | 124.1 | 104.8 |
| 20-24 | 8.3 | 7.9 | 9.2 | 10.0 | 115.3 | 102.0 |
| 25-29 | 7.4 | 6.9 | 8.4 | 7.9 | 118.7 | 118.6 |
| 30-34 | 6.0 | 5.7 | 7.0 | 6.1 | 115.3 | 127.8 |
| 35-39 | 5.4 | 5.4 | 5.0 | 4.8 | 109.5 | 119.5 |
| 40-44 | 4.7 | 4.9 | 4.5 | 4.7 | 106.1 | 107.5 |
| 45-49 | 3.8 | 3.7 | 3.6 | 3.5 | 114.7 | 114.9 |
| 50-54 | 3.6 | 3.1 | 3.1 | 2.9 | 127.6 | 120.0 |
| 55-59 | 1.9 | 1.7 | 2.0 | 1.8 | 123.6 | 122.1 |
| 60-64 | 2.6 | 2.1 | 1.9 | 1.8 | 141.8 | 119.2 |
| 65-69 | 1.0 | 0.9 | 1.0 | 0.9 | 126.2 | 122.3 |
| 70-74 | 1.2 | 1.0 | 0.8 | 0.8 | 129.0 | 114.1 |
| 75+ | 1.2 | 1.2 | 0.9 | 0.9 | 114.2 | 111.0 |
| All age groups | 100 | 100 | 100 | 100 | 110.7 | 111.7 |

The above table would reveal that population is relatively young as its proportion under 15 years age groups both for males and females is large, though it has slightly declined in 1998 as compared to 1981. The middle age groups are showing proportional increase for age groups 15-19 to 30-34 and decline for age groups 35-39 to 50-54. Typically the age group 55-59 is showing marginal increase in its proportion. The proportion has again nominally declined for advanced age groups i.e., 60 and over.

The decline in the early age groups population proportion i.e., below 15 could be a positive sign of fertility decline, irrespective of the fact that child mortality might have also improved. However, it is still to be seen that the population have a great potential of growth during the coming period as young people will grow into adults, a potential source of future births. As regards middle age groups the proportional variation could be attributed to carry over of the population which was in the younger age groups in the last census. The decline in the proportion of population in advance age groups i.e. 60 and over could be due to relative over statement of ages and over enumeration in these age groups in the last census or better reporting of ages and enumeration in this census.

The overall sex ratio (males for every 100 females) have increased to 111.7 in 1998 as compared to 110.7 in 1981, which is typical in the sense that it has increased for Pakistan, Punjab and NWFP. Similarly the sex ratio by 5 years age groups are also showing some typical trends in view of the fact sex ratio of age groups 30-34 to 45-49 have also increased, which could be due to errors of age reporting of either sex or coverage in 1981 or 1998. The dependency ratio has also improved to 83.5 percent in 1998 which was 93.9 percent in 1981.

MARITAL STATUS

The following table gives the comparative picture of marital status distribution of population of Sindh (15 years and above) by sex and rural/urban areas for the 1981 and 1998 censuses.

| Marital Status | 1981 | | | 1998 | | |
|--------------------------|-------|-------|-------|-------|-------|-------|
| | Total | Rural | Urban | Total | Rural | Urban |
| Never Married | | | | | | |
| Both sexes | 24.81 | 20.16 | 30.41 | 30.10 | 23.65 | 36.06 |
| Male | 31.94 | 28.01 | 36.48 | 35.05 | 28.80 | 40.54 |
| Female | 16.38 | 11.27 | 22.86 | 24.50 | 18.16 | 30.72 |
| Currently Married | | | | | | |
| Both sexes | 69.14 | 73.49 | 63.89 | 64.82 | 71.22 | 58.89 |
| Male | 65.25 | 69.10 | 60.80 | 62.32 | 68.22 | 57.14 |
| Female | 73.74 | 78.46 | 67.74 | 67.64 | 74.42 | 60.98 |
| Widowed | | | | | | |
| Both sexes | 5.90 | 6.21 | 5.53 | 4.90 | 5.01 | 4.80 |
| Male | 2.70 | 2.79 | 2.59 | 2.52 | 2.91 | 2.19 |
| Female | 9.69 | 10.10 | 9.18 | 7.59 | 7.25 | 7.92 |
| Divorced | | | | | | |
| Both sexes | 0.15 | 0.13 | 0.17 | 0.19 | 0.12 | 0.25 |
| Male | 0.12 | 0.11 | 0.13 | 0.11 | 0.08 | 0.14 |
| Female | 0.19 | 0.02 | 0.22 | 0.27 | 0.16 | 0.38 |

From the above it would be observed that proportion of never married population has increased with corresponding decrease in the population proportion of currently married both for males as well as females from 1981 to 1998 census. It is however, note worthy that increase in the proportion of never married and decrease in the proportion of currently married is relatively higher for females. This might cause fertility decline in the long run in view of the fact that incidence of marriage has declined.

The overall divorced proportion is almost comparable during 1981 to 1998 census. As far as differentials for sex are concerned the level has gone up for females especially for urban females. The proportion of widowhood have

decreased from 5.9 percent to 4.9 percent which, might be due to mortality decline. The proportion of widowhood is significantly higher in females in comparison to males which might be due to re-marriage of males after widowhood.

If we compare rural/urban differentials the percentage of never married is higher in urban areas both in 1981 and 1998 in contrast to the proportion of currently married which is higher in rural areas. The widowed proportion is relatively higher in rural areas in contrast to divorced which is higher in urban areas. The marital status distribution in detail by age and sex is given in Table No. 3 by which it would appear that number of never married is increasing at younger ages i.e., 15-19, 20-24 both for males as well as females with a slight edge for males.

LITERACY

The following table gives comparative figures of literacy ratios of population of Sindh (10 years and above) by sex and rural/urban area :

| Area | Total | | | Urban | | | Rural | | |
|-------|-------|------|--------|-------|------|--------|-------|------|--------|
| | Both | Male | Female | Both | Male | Female | Both | Male | Female |
| | Sexes | | | Sexes | | | Sexes | | |
| Sindh | | | | | | | | | |
| 1998 | 46.7 | 56.6 | 35.4 | 65.2 | 72.1 | 57.1 | 26.9 | 39.5 | 13.1 |
| 1981 | 31.4 | 39.7 | 21.6 | 50.8 | 57.8 | 42.2 | 15.6 | 24.5 | 5.2 |

Sindh's literacy ratio has increased from 31.4 percent in March, 1981 to 46.7 percent in March, 1998, showing an increase of 49 percent. There are sharp differences in literacy ratios of male and female population with a female literacy showing an overall increase of more than 63 percent. Similarly, there are sharp differences in rural and urban literacy. The increase in rural female literacy is more pronounced which has increased by almost less than three fold. The ratio swings from as high as 72.1 percent for urban males to as low as 13.1 percent for rural females.

EDUCATIONAL ATTAINMENT

Ninety six hundred thousand persons were found to be either attending educational institutions or had attended earlier in 1998 census. The percentage distribution by level of education is as under:-

| Level of Education | Both Sexes | Male | Female |
|----------------------------------|------------|------|--------|
| Below Primary | 15.6 | 14.9 | 17.0 |
| Primary | 27.4 | 26.5 | 29.0 |
| Middle | 19.6 | 19.7 | 19.5 |
| Matric | 18.2 | 18.9 | 16.8 |
| Intermediate | 8.8 | 8.9 | 8.7 |
| B.A./B.Sc. & equivalent | 7.0 | 7.2 | 6.6 |
| M.A./M.Sc. & equivalent or above | 2.5 | 2.9 | 1.9 |
| Diploma/Certificate | 0.6 | 0.8 | 0.2 |
| Others | 0.3 | 0.2 | 0.4 |

According to the above figures 27.4 percent have passed the primary education, 19.6 percent middle and 18.2 percent matric. After matric the percentage falls to 8.8 for intermediate 7.0 for graduates and only 2.5 for post graduates.

Out of total female population who have passed primary, middle and matric the percentages are 29.0, 19.5 and 16.8 respectively. Amongst total graduates/post graduates 31.4 percent are females.

Dated : January 15, 1999
